

What is your invention called?

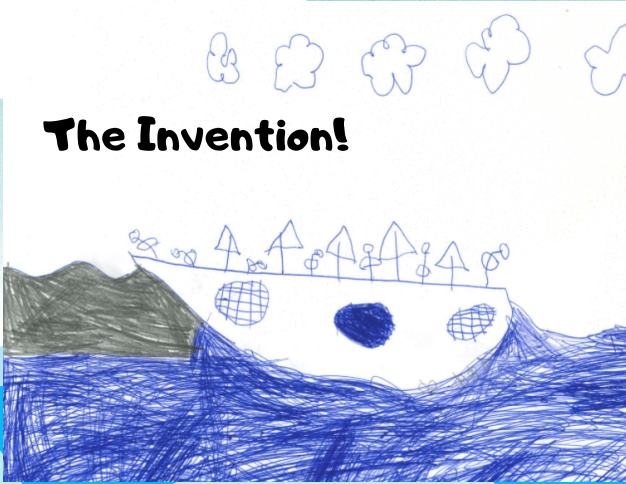

By: Ronan

The Oil Eater

How does your invention work?

Eats up the oil, pulls it in the ship, and once full it opens a portal to send the oil somewhere safe.

The Invention!

What is the purpose of the invention?

The purpose is to use it to get rid of the oil in the ocean

How will the impact of the invention will be measured?

I can tell my project is doing its job by measuring how much oil is collected from the ocean.

Name the basic components/features of your invention.

- Sails
- Radar dishes
- Grates on the parts to suck up oil so fish don't get in
- And of course the portal.

Little
Inventors

What are the main problems that inspired your invention

- Too much oil the ocean
- Oil makes fish sick

What should other people (family, friends, and strangers) do every day to help keep the oceans clean?

RECYCLE

Why are these problems important to you?

- Dont want fish to become sick because we eat a lot of fish.
- I want to have clean water.

Rohan's Biography

Hello, my name is Ronan. I am 9 years old. I live in Calgary near rivers and lakes. I want the ocean to be clean so that I can visit it and maybe see some whales. I love to play video games. My favorite is DOOM ETERNAL. My brother is 7 years old, and his favorite video game is Minecraft.
